

Download Parker's Free Actuator Software

New sizing software expedites your selection process — and faster lead times expedite your order!

Discover how quick and easy the OSPE series (Origa System Plus Electro-mechanical) actuator is to use in your machine design. Use OSPE when time and cost of ownership are the drivers — without sacrificing reliability, high performance, simple sizing and selection, flexible design integration and on-time production.

Parker's free EL sizing program, with its simple three-step process, allows you to size and select in minutes. The CAD configurator, meanwhile, provides customized drawing for easy design integration, and quick lead times keep planning flexible and production on time.

Moreover, lead times on the OSPE have been [reduced to 10 days](#), and we're able to turn around custom products faster than ever before!

For more information on the OSPE, download our 84-page, full-color catalog [here](#).
